MESSAGE FROM COMPANY

Kartikeya Jadhav

Dear Kartikeya Jadhav ,

At the outset, let us take this opportunity to congratulate you for taking the decision of going for **Brain Checker Psychometric Assessment or Caliber Intelligence Quotient Test Advanced also known as CIQT-A (Advanced)**.

An Intelligence Quotient or IQ as it is popularly known as is a sum total of score derived from several standardized tests. These tests are designed to assess human intelligence. The abbreviation IQ was coined by famous German Psychologist Dr. William Stern, Professor, University of Berlin. He was the inventor of the now famous IQ Tests. His work was later used by Dr. Alfred Binet to further research in the field of human intelligence.

Psychometric Tests are by no means a new concept; they have been used since the early 20th century, when they were originally used only for the purposes of educational psychology. A psychometric test is any activity and assessment that is conducted in order to evaluate candidate performance and includes, but is not limited to, skills and knowledge, abilities, personality traits, attitudes and job/academic potential. The Brain Checker Psychometric Test is a amalgamation of the CIQT which is a tool used to identify the test taker's Intelligence Quotient along with Dr. John Holland's RIASEC Theory popularly known as Holland's Occupational Codes coupled with a Personality Assessment of the Test taker, making CIQT-A (Advanced) one of the most comprehensive Psychometric Test to also provide the test taker cross comparative with 200+ Career Options. At Brain Checker, each report is diligently prepared using latest scientific tools and techniques by expert Psychologist ensuring sustained accuracy & precision.

We sincerely hope that the **Brain Checker Psychometric Assessment** helps you in identifying your caliber and assist's you in choosing your right career path. Once again, we personally thank you and congratulate you for taking this decision and we assure you of having wonderful and unforgettable pleasant experience with **Brain Checker**

Best wishes!

A word cloud of career-related terms in various shades of blue. The words are arranged in a dense, overlapping pattern. The largest word is 'CAREERS'. Other prominent words include 'OPPORTUNITY', 'PEOPLE', 'GENIUS', 'TEAM', 'TALENT', 'FUN', 'GOALS', 'SMART', 'QUALIFICATIONS', 'PERSONALITY', 'COMPETITIVE', 'DRIVE', 'NETWORK', 'CREATIVE', 'SUCCESS', 'DEVELOPMENT', 'JOB', 'LOVE', 'SALARY', 'INNOVATIVE', 'INDUSTRY', 'REFERENCE', 'OPEN', 'BUSINESS', 'ASSOCIATE', 'MANAGER', 'LEADER', 'MENTOR', 'COACHING', 'PROVE', 'ABILITY', 'CONNECT', 'INFLUENCE', 'SEEKING', 'HUMAN', 'RESOURCES', 'PATH', 'IMPROVE', 'QUALITY', 'ASSURANCE', 'EXECUTIVE', 'TECHNOLOGY', 'SPARK', 'HIRING', 'SUPPORT', 'TRAINING', 'UNITE', 'CANDIDATE', 'JOIN', 'ALIGN', 'FOCUS', 'BEST', 'FAST', 'EXCITING', 'RESUME', 'PASSION', 'BONUS', 'OFFER', 'SEARCH', 'SKILLS', 'PROJECT', 'MANAGEMENT', 'RECRUIT', 'COMMISSION', 'DIRECTION', 'BROADCAST', 'MEDIA', 'ENABLE', 'GLOBAL', 'LEADER', 'WORK', 'CERTIFICATION', 'EDUCATION', 'TITLE', 'SELECTION', 'INTERVIEW', 'SOFTWARE', 'COVER', 'LETTER', 'CHOICE', 'LOS ANGELES', 'MIAMI', 'LONDON', 'LOS ANGELES', 'MIAMI', 'LONDON'.

BRAIN CHECKER: AN OVERVIEW

Kartikeya Jadhav

Brain Checker™ is India's Largest Career Counseling Company with over 500+ Testing Centers in over 23 States in India. Brain Checker™ was awarded India's Top 100 Emerging Company in 2014 by coveted magazine "The Franchising World 2014".

Brain Checker was born in 2012, with a mission to assist students across India in matching their aspirations with their capabilities. Over the last few years, Brain Checker has assisted over 5 Lakh students in making informed career choices using the latest tools & techniques in Psychology. We are an ISO 9001:2008 Certified Company with over 40+ PhD's & Doctor's working with us to assist students shape their dreams!

Brain Checker provides counseling services for:

- Early Education & Development
- Multiple Intelligence & Evaluation
- Career Guidance & Stream Selection
- ADHD, PTSD, Depression, Stress Management et al.

Brain Checker has collaborated with world's leading Psychologists including Dr. Jonathan Oliver, Dr. Peter Blair, Dr. Greg Wallace and more. Brain Checker is currently working in India, Nepal & Nigeria.

OUR ACHIEVEMENTS:

Brain Checker is:

- Awarded India's Top 100 Emerging Company of 2014, by "The Franchising World 2014"
- Only Indian Company with International Collaborations with World's Leading Psychologists
- Member of American Psychology Association
- Member of Indian School Psychology Association & Early Education Council of India
- Member Franchise Association of India
- Recognised by Leading Newspapers including: Dainik Bhaskar, Divya Marathi etc

OUR TESTING SERVICES

Brain Checker Offers:

- Multiple Intelligence Testing Services (MIT)
- Caliber Intelligence Quotient Test (CIQT)
- Psychometric Testing (CIQT-Advanced)
- Brain Stamina (Cognitive Brain Development Program)

BRAIN CHECKER PSYCHOMETRIC TEST

Brain Checker™ has put in considerable amount of effort to design and developed the Brain Checker Psychometric Test also known as Caliber Intelligence Quotient Test- Advanced or CIQT-A. The Brain Checker Psychometric Test has been developed in-house by the Brain Checker Team. The Test has received validation from noted psychologist Dr. Jeffery Smith having over 20 years of experience in Psychology. CIQT-A, is a unique blend of:

- **Intelligence Quotient** (Assessed Using CIQT)
- **Occupational Assessment** (Assessed Using RIASEC Codes)
- **Personality Evaluation** (Assessed using Jungian Personality Method)

CIQT-A is based on CIQT, India's First Indianised proprietary test developed to understand the Intelligence Quotient of an Indian student. CIQT scores provide the parents with a in-depth understanding of their child's current academic caliber which in turn helps in sorting of compatible career choices. **CIQT Advanced**, is a one and half hour (90 Minute) test for students aged 13 years and above and is currently administered in India in English & Hindi language only.

CIQT-Advanced Evaluates a Child on the following parameters:

- Retention
- Numerical Handling
- Sensing
- Word Understanding
- Spatial Observations
- Spatial Patterns
- Logical Analysis
- Arithmetic Chronology
- Spatial Co-Relations
- Creative Application
- Occupational Assessment
- Personality Evaluation

CIQT ADVANCED CONCLUSIONS:

CIQT Advanced concludes the following:

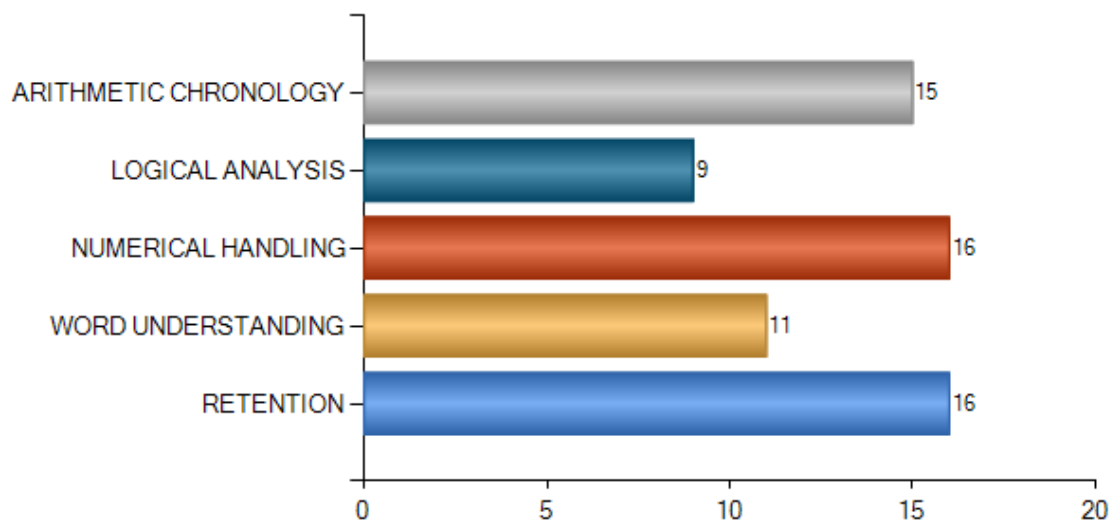

- Intelligence Quotient of the Child
- Right Brain Dominance & Left Brain Dominance
- Logical & Linguistic Ability
- Current Caliber & Moderated Score Card for each parameter
- Occupational Rating based on RIASEC Method
- Personality Code based on Carl Jung Personality Codes
- Career Recommendations

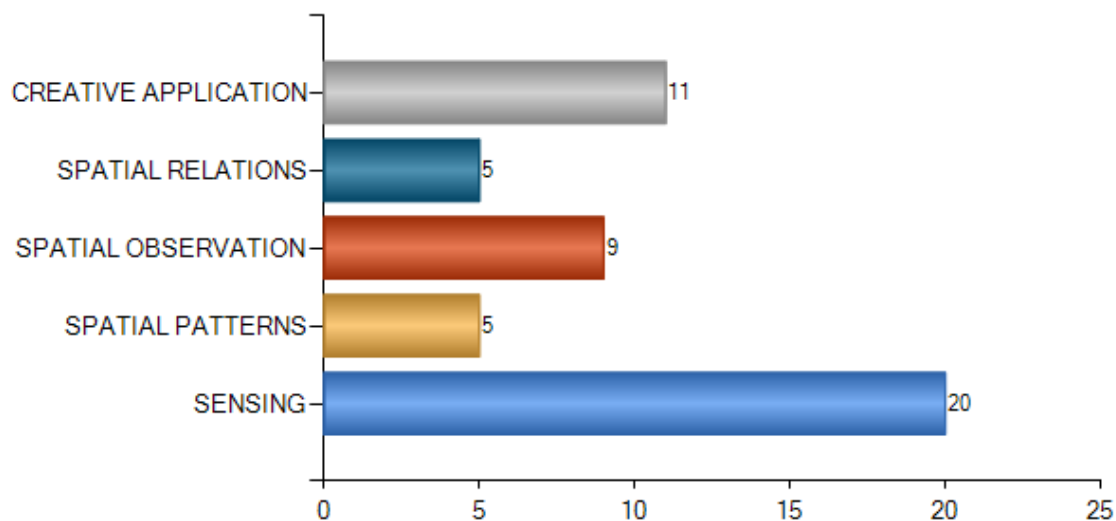

SYNOPSIS OF ANALYSIS

Kartikeya Jadhav

Left Brain Test Overview

Right Brain Test Overview

Kartikeya Jadhav

IQ SCORE

SR.NO	SCORING RANGE	CLASSIFICATION
1	50-79	MODEST
2	80-89	BELOW AVERAGE
3	90-109	AVERAGE (NORMAL)
4	110-119	SUPERIOR INTELLIGENCE
5	120-129	VERY SUPERIOR INTELLIGENCE
6	130-139	GIFTED
7	140+	GENIUS

PARAMETER WISE SCORE CARD

Kartikeya Jadhav

Overall IQ Score for Caliber IQ Test is derived from the sectional scores of first 10 Tests designed to evaluate all parameters which collectively form one's IQ. Enclosed herein are the sectional scores from first 10 sections divided between right brain tests & left brain tests:

LEFT BRAIN SECTIONAL SCORES:

Sr. No.	Test Conducted	Moderated Scores (All Scores out of 20)
01	Retention Test	16
02	Word Understanding Test	11
03	Numerical Handling Test	16
04	Logical Analysis Test	9
05	Arithmetic Chronology Test	15
LEFT BRAIN MODERATED SCORE		67

RIGHT BRAIN SECTIONAL SCORES:

Sr. No.	Test Conducted	Moderated Scores (All Scores out of 20)
01	Sensing Test	20
02	Spatial Patterns Test	5
03	Spatial Observation Test	9
04	Spatial Co-Relations Test	5
05	Creative Application Test	11
RIGHT BRAIN MODERATED SCORE		50

Important Information:

Scoring Range Classification, Testing Score, Sectional Scoring parameters are strictly defined under the research undertaken over several years by several Psychologist's & Experts. These scores and patterns are fixed to standardize evaluation

12 PARAMETERS AT A GLANCE

The CIQT Advanced dwells into evaluating the test taker on 12 different abilities and parameter's to provide a holistic IQ Score, Personality & Job Compatibility. Each section has a specific purpose and is designed accordingly. In this section, you would get an gist of the each test conducted & its importance

SR.NO	TEST TYPE	TEST INFORMATION
1	RETENTION TEST	Retention is the process in which information is encoded, stored, and retrieved. Encoding allows information from the outside world to be sensed in the form of chemical and physical stimuli. Retention Test measures your ability to memorize information, store it & retrieve it
2	SENSING TEST	Sensing can be defined as our recognition and interpretation of sensory information. Sensing or Perception also includes how we respond to the information. We can think of perception as a process where we take in sensory information from our environment and use that information in order to interact with our environment.
3	WORD UNDERSTANDING TEST	Reading comprehension is defined as the level of understanding of a text/message. This understanding comes from the interaction between the words that are written and how they trigger knowledge outside the text/message. This test measures it.
4	SPATIAL PATTERNS TEST	A spatial pattern is a perceptual structure, placement, or arrangement of objects. This test measures Spatial Patterns
5	NUMERICAL HANDLING TEST	The ability to handle, evaluate & decode information from a numerical sequence is measured in the Numerical Spanning Test
6	SPATIAL OBSERVATION TEST	Visual Observation Tests are designed to identify and classify oddities or seeked information from provided images.
7	LOGICAL ANALYSIS TEST	Logical Analysis Tests are designed to evaluate reasoning & one's ability to use Logic in solving data interpretation problems
8	SPATIAL CO-RELATIONS TEST	Spatial Co-Relations Test are designed to measure the ability to visualize information & use it to solve visual problems.
9	ARITMETIC CHRONOLOGY TEST	Arithmetic Chronology Test's are sequencing tests with a logical trait. These are specifically designed to gauge the brains ability to sequence numbers as desired.
10	CREATIVE APPLICATION TEST	This test is designed to deploy creative thought process of the test taker to evaluate his/her creative bend of mind.
11	RIASEC TEST	This Test also known as Dr. John Holland's Occupational Evaluation or Codes is designed to understand the inclination of a child's occupation.
12	JUNGAN PERSONALITY TEST	This Test is designed on the theory of Dr. Carl Jung and is aimed at understanding the test taker's personality

Holland Theory

Dr. John Holland

John Lewis Holland (Oct. 21, 1919 – Nov. 27, 2008) was Professor Emeritus of Sociology at Johns Hopkins University and an American psychologist. He died on November 27, 2008, at Union Memorial Hospital. Holland is best known as the creator of the career development model, Holland Occupational Themes. After graduation, Holland served in the army for 4 years, he worked as a classification interviewer, test proctor, psychological assistant and Wechsler test administrator.

This experience led to his belief that many people exemplify common psychological types, although his training had fostered the belief that people are infinitely complex. He was also able to work with and get training from social workers, psychologists and physician experiences that stimulated his desire to become a psychologist. He next entered a doctoral program in Counseling psychology at the University of Minnesota where he was an average student and had trouble finding an interesting thesis topic but he finally settled on a validation of some speculations about art and personality. This topic did not set well with fellow students or faculty despite its straight forward empirical design. Holland eventually got the doctorate and 10 sets of used painting materials.

Holland's Theory can be summoned in 6 statements:

- 1) In our culture, most people are one of six personality types: Realistic, Investigative, Artistic, Social, Enterprising, and Conventional. Some refer to these as Holland Codes or RIASEC.
- 2) People of the same personality type working together in a job create a work environment that fits their type. For example, when Artistic persons are together on a job, they create a work environment that rewards creative thinking and behavior - an Artistic environment.
- 3) There are six basic types of work environments: Realistic, Investigative, Artistic, Social, Enterprising & Conventional
- 4) People search for environments where they can use their skills and abilities and express their values and attitudes. For example, Investigative types search for Investigative environments; Artistic types look for Artistic environments, and so forth.
- 5) People who choose to work in an environment similar to their personality type are more likely to be successful and satisfied. For example, Artistic persons are more likely to be successful and satisfied if they choose a job that has an Artistic environment, like choosing to be a dance teacher in a dancing school- an environment "dominated" by Artistic type people where creative abilities and expression are highly valued.
- 6) How you act and feel at work depends to a large extent on your workplace environment. If you are working with people who have a personality type like yours, you will be able to do many of the things they can do, and you will feel most comfortable with them.

Holland's RIASEC Theory

Kartikeya Jadhav

Realistic

85.71 %

- People with mechanical & athlete abilities, like working outdoor with tools and objects, prefer dealing with things rather than people.

Conventional

57.14 %

- People with clerical and math ability, prefer working indoors and organizing things, like to deal with words & numbers rather than people or ideas.

Enterprising

85.71 %

- People with leadership & speaking abilities like to be influential, interested in politics & economics, like to deal with people & ideas rather than things.

Investigative

71.43 %

- People with math & science abilities, like to work alone & solve complex problems, like dealing with ideas rather than people or things.

Artistic

28.57 %

- People with artistic ability & imagination enjoy creating original work, like dealing with ideas rather than things.

Social

71.43 %

- People with social skills, interested in social relationships helping others, solve problems, like dealing with people rather than things.

Kartikeya Jadhav

Carl Jung Personality Theory

Dr. Carl Jung

Carl Gustav Jung (Jul. 26, 1875 – Jun. 06, 1961) was a Swiss Psychiatrist and Psychoanalyst who founded Analytical Psychology. Dr. Carl Jung was one of the World's Most renowned experts in Psychology and had worked extensively in the field of Psychology.

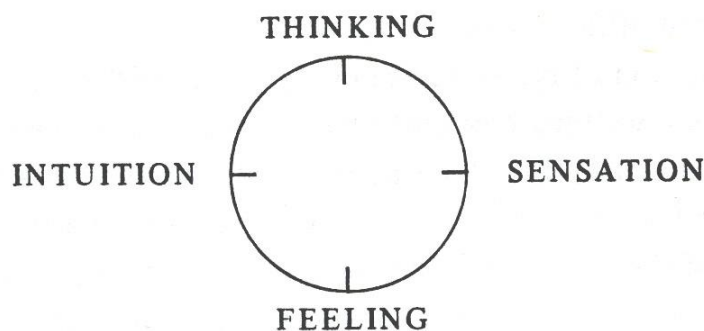

He Professed several Theories and was single handedly responsible for creation of batteries of tests, assessments to know more about Human Psychology. One of his most famous work's was the 16 Personality Type Assessment .

One of Norway's famous Psychologist Dr. Thor Odegard and Dr. Hallvard E Ringstad, created a easily implementable version of the 16 Personality Types Theory and named it the Jungian Type Index famously known as the JTI.

JTI is categorized into 16 Personality Types:

- 1) There are 4x2 Parameters for evaluation of the JTI namely Extraversion/Introversion, Intuiting/Sensing, Thinking/Feeling, Perceiving/Judging.
- 2) The basic premise is that a person can have only one dominant pre-disposition
- 3) The objective of the JTI is to evaluated a person on these 4x2 Parameters and to understand their Personality Type
- 4) Each Personality Type has a one of all the 4 Cognitive Functions arranged in a different order
- 5) It is largely used as a part of Analytical Psychology to evaluate a Person's Personality to understand their strengths and weaknesses. It is also used largely to help in Career Planning and Assessments across the world.
- 6) JTI is predominantly used in the European Continent and Nordic Nations and has a remarkable level of accuracy, which helps the test taker dwell into his own psyche to know more about oneself.

JUNGIAN TYPES

Carl Jung Personality Score

Kartikeya Jadhav

EXTROVERT

- Extroverts find energy in things and people. They prefer interaction with others, and tend to be action oriented. They also tend to think on their feet. They talk more than they listen.

SENSING

- Sensing people tend to rely on their five senses. They are detail oriented. They want facts to trust anything. They are organized and systematic.

THINKING

- Thinkers decide things based on logic, analysis and principle. They are objective decision makers. They naturally see flaws & are critical of it.

JUDGING

- Judging people are decisive, self-starters and self-regimented. They plan their work and are focus on completing the task at hand. They adhere to deadlines.

INTROVERT

- Introverts find energy in the inner world of ideas, concepts and abstractions. They can be sociable but need tranquility to regain their energy. They think more than they talk.

INTUITIVE

- Intuitive people tend to rely on emotions. They trust their hunches and prefer focusing on the big picture. They are more imaginative.

FEELING

- Feelers value harmony by focusing on human value. They tend to be good at persuasion. They are subjective decision makers.

PERCEIVING

- They are curious, adaptable & spontaneous. They start many tasks but often find it difficult to complete a task., are process oriented & break down complex jobs into small tasks.

Feedback Form

{FOR COMPANY USE ONLY. TO BE FILLED BY COUNSELOR.}

This section helps us evaluate how effective the experience to undergo **BRAIN CHECKER** Test was and your overall feedback along with references if any are sought in this section.

How would you rate our **knowledge, skills and findings about you** before and after the test in the following areas (please circle the most appropriate response):

1. The **clarity** about you own self based on the Brain Checker Psychometric Test:

After Test: ☐ Poor ☐ Fair ☐ Good ☐ Excellent

2. Your **confidence** to work on the recommendations:

After Test: ☐ Poor ☐ Fair ☐ Good ☐ Excellent

Based on your own experience, would you recommend "**BRAIN CHECKER** CIQT-A" to relatives, friends?

Recommend to Others: Yes ☐ No ☐ Maybe ☐
